

Courage

Mölleskolan 5

Instr. intro

Vers

This world can be a shitty place in so many ways
It seems like no one's taught to be nice these days
People talk behind your back though they're friendly face to face
Everything is competition though you want to embrace,

Stick

But I refuse to be like that
I say "hello" and lift my hat
To unknown fellows on the street
I want to help, not to compete!

Refräng

I'll have the courage to be loyal,
I'll have the courage to be brave
I'll have the courage to be generous
Even if it will be my grave,
I'll have the courage to be happy
Though they're trying to make me hate
And I'm sure we can do it, baby,
It's our destiny and our fate!

Vers

When there's talk about war, I will talk about peace,
When they scream about jails, I will say "release!"
When people are hungry, I'll bring bread and cheese,
And if you are mean, I'll say "Stop it, please!"

Stick

'Cause life should be more play and fun
We need more toys and not more guns,
So take a stand for this, don't run,

and teach your daughters and your sons

Rap

That every other human is a possible friend
That if we all say no to fighting, all the wars would end,
That no one would have to steal or beg if we all could lend
a hand, be grand, our land
is big enough for every colour, every race,
every gender, every faith,
So stop messing us up with all that vicious hate!
If you have nothing kind to say then please shut the BEEP up,
This is what we preach, and we'll never give up!

Refräng

I'll have the courage to be loyal,
I'll have the courage to brave
I'll have the courage to be generous
Even if it will be my grave,
I'll have the courage to be happy
Though they're trying to make me hate
And I'm sure we can do it, baby,
It's our destiny and our fate!

Refr 2

Shalalala la la....

Courage! Courage! Courage!
